

## Re-Usable Cloth Products

### Removing the barrier between your practice and clean infection control.™

680 million chair barriers, light handle covers, and patient bibs. 1.7 billion sterilization pouches. This is the estimated waste contributed to landfill every year from US dental office infection control and sterilization products.\* Good for compliance, messy for the planet.

Transcendentist® re-usable cloth products offer state-of-the-art fabrics and plastic-free construction so your practice can protect patient health *and* planetary health. And our roomy cloth patient bibs don't require a chain, eliminating a source of cross-contamination.

With Transcendentist® products, cost isn't a barrier to doing what's right ~ the switch can actually save your practice thousands of dollars a year! And using them takes no more time than throw-away methods.

### Sterilization Pouches & Wraps

## Joysence™ Aromatherapy Line

### The scent of a productive dental practice.™

---

Does the way your office smells affect your production? It just might!

Our sense of smell links directly to the seat of emotion and memory in our brains – triggering an involuntary emotional response. “That dental office smell” can set off alarms for many patients, sending them running for the door, or frantically finding excuses to cancel their next appointment.

The Joysence™ line of Hand Sanitizer, Lotion, Room Spritz, and Hand Soap contains a proprietary blend of pure plant essential oils, specially formulated to reduce patient fear and anxiety. Unlike dental office chemicals, the Joysence™ aroma engenders a sense of calm, relaxation and well-being; even joy!

Joysence™ products are all natural and paraben-free. Our hand-sanitizer is formulated with 62% organic alcohol, making it compliant with CDC guidelines for health care settings.

*The soothing aroma works on dentists too!*

Item Number	Joysence Product	Cost (each)
